FRIDAY, FEBRUARY 13, 1863.

French Packet Review.

Men's minds have been so occupied with the alarming specie crisis of the last 1 days, that they have scarcely had time to think of anything else. Happily the mail-bag of the interior has no exciting news to startle us from our gravity, and the terrible fluctuations of gold may be, after all, a providential circumstance to recover us from the *ennui* of stagnation.

Doubloons have risen 10 per cent in a couple of days and fallen in the same ratio, rebounding like an India rubber ball, and baffling all attempts to stay them or retard their velocity. This gave rise to a public meeting in the Theatre, with the object of devising a remedy. A committee of 7 influential citizens having waited on our National and Provincial Governments, assured the commercial body that Gen. Mitre and Gov. Saavedra were friendly to their idea of starting a People's Bank without delay, slowly but surely slouch the paper-currency. About 1,000 persons, mostly grocers, attended the last meeting and so enthusiastic a spirit was inspired by Mr Billinghurst a city auctioneer, that 1,000 shares of $10 silver were taken up. Our English capitalists regard the project as a mere chimera, and such difficulties surround it that we can scarcely believe the idea has affected specie either pro or contra.

The chief topic of the rival journals is the execution of a prisoner named Tiscornia by Juan, by Col. Sandes, who, without judge or jury, shot the poor fellow on the reasoning that it appeared *he had, once, been a spy.* It is not proved that Sandes' assertion was correct, if it be so, he was not justified in shooting him for no offence only as punishable in *General Orders.* Negro, how approve on Sandes' excuse and suppose Tiscorn a spy when *he* could not prove he "spoiled" him in time of peace.

The Yermejo expedition under Lavalle promises to cause as much interest as that of the Rio Salado under Gen. Rosas. The Bed is remarkable as one of its members, Mr Blyes, an American gentleman, goes on the express mission of preparing the way for an attempt to We are happy to say that Mr Wheelwright, the indefatigable, has begun his on the part of the Government, when the them on the same footing here, as the advantages of the backwoods hold in North America. Mr Blyes' companion, Dr bell, will be changed, owing to the fact that Dr Bell is a Government official of Dr Hutchinson, is looking out for mines in the territories, and in this also the secondary objects of the expeditions are of immense importance to our country.

Mendoza is still said to be suffering much from physical and political convulsion. Assault is confirmed that the Governor than half the necessary capital will be turned out by Chambers with a majority of 2 to 1. Should the contemplated railway force, perhaps they had an econ- company will be formed, which will be docted themselves. In Tucuman a ali- a novelty in our history, as hitherto ght earthquake has visited the town. Sar- our capitalists have been rather behind. miento promises to make the San Juan Indeed in all the Argentine Republic, Buenos Aires excepted, there is not a single joint stock company in existence.

Cordova trade in the provinces is very dull, tranquility is empty, and the province and shopkeepers seem careless about complaining that B. Ayres is a hard step- stocks of goods in their store. A few unimportant purchases have been made of the English prints and calicoes, but business in the frontier ness could not be done. Either the Government or Congress will shortly come to a decision as to the plans of irrigation; the latter is the country-people have no money to buy, the trade with a body of cavalry clear- as the purchases during the season have ing the country of gaucho robbers. been out of all proportion with those of other years.

Urquiza scems quiet enough at his farming occupations in Entre Rios, but the projects of his party are very menacing and those out-lines which can scarcely hope to be realized. President Mitre, in his address to other provinces, has a difficult role to play, in seeking to bring about his policy with local feelings, and at the same time, with the ambitious egotism of B. Ayres.

In this city we kept holiday on the 12th inst., which was the 11th anniversary of Rosas's fall, but the day passed off very stupidly. One of our youthful dramatic amateurs cut up V. Hugo's late work into a piece called Juan Vaigen, but the tailoring was said to be truly *Miserable*, and although the authors's result was twice announced, it never came off. We notice daily arrivals of young Englishmen, and regret many of them are commercial clerks, who of all others find it most difficult to employ themselves. The hot weather has much abated. Health of the city very good. Carnival will commence on Sunday.

INDUSTRIAL REVIEW.

At once the industrial resources of the Argentine Republic are immense, and, under a wise and liberal government, with a few years of peace, susceptible of great development, still, as at present situated, the industry of the country is so limited, the population so scanty in the in erior, and capital so much wanting, that an industrial review every fifteen days is more a repetition of prospects and promises, than a plain short statement of realities.

In the province of San Juan a large tract of land has been set apart by the Legislature for agricultural uses, which Major Rickard intends to bring out with him on his return to this country. Some of the other provinces, also in the temperature of immigration, have offered estancia and chacra lands gratis; but we await the meeting of Congress, in May, in order to see what will be agreed upon, printed from the National Treasury, for the purpose of fostering immigration to the River Plate.

We anxiously look for and to the arrival of some cotton seed. The Government of Santa Fé has acknowledged the receipt of 12lbs. from the National Government, and asks for more, but in his communication he has forgotten to state that we have also supplied him with a sack containing ab- ut 100lbs. Lwt. Cotton seems, however to take a lively interest in the matter, and promises every assistance to further the growth of cotton in his provinces.

In Entre Rios, Mr. Puente (a native ve gentlemen of great energy) is doing his utmost for us, and we la e every reason for believing that Governor Urquiza will prove a steady man in his praise-worthy and patriotic efforts.

The principal industry in the interior of Buenos Aires is the saladero business, which, owing to the mul it de of fat cattle, and great poverty of the estancieros, promises good returns for the year. Owing to the severe season the re has not been so much activity in this business in former years as at prese t. As the paper currency of this country is so confined to B. Ayres, a very brisk demand has sprung up for Doubloons, which has had a most injurious effect on our money market. God has been very bountiful to many of us all, not so much from speculati on as from the increased demand for the hides of the killing season ceases, the ounces will return again to this market, but not sooner.

Corrientes bids fair to outstrip all her sister provinces in the great articles on is be ng paid not only to cotton, but al o to tobacco, which is of a superior quality to even that of Paraguay. The present Governor is very happy to say exhibits the greatest interes t in introducing these staples; and since a cargo of land are laid out in both cotton and tobacco plantations, labor is cheap and plenty, and money can be had at 6 per Cent. The Banks have done that same, and we find ourselves now, when the busy season is almost over, with money very tight, and more than double the drawn a few months ago.

The Provincial Government has also last agreed to pay the stock held re- of the Western Railway the par value of their shares, with 6 per Cent. since creation. This will relieve our money market, and circulate about half a million of paper currency.

The sheep farmers have had plenty of rain during the summer months, and the grass is most abundant, everywhere. The year has been well, and everything promises a good lambing season. There are yet about 400,000 arrobas of wool in the country parts, which probably will not be brought to market before prices grow better.

COMMERCIAL REVIEW.

FREIGHTS.

We have no alteration to notice in the rates of freight to Europe, excepting only that as a large number of sailing vessels have arrive during the fortnight freights cannot be considered so firm.

Hides continue to rule most effectively but there is an improvement on last month; wool is offering in abundance and also tobacco of which over 2000 bales engaged during the past week.

The following charters have been effected since our last.

British brig *Western Star* to load in he Uruguay at 65 shillings 5 per cent alleed hides for orders.

Dutch schooner *Antonius* 60 shillings salted hides 50 do for Belfast.

French ship *Maris Elize* hides only for Havre at 80 francs, 10 per cent.

EXCHANGE.

Transactions by this mail amount to £200,00 sterling drawn on England at the rate of 6d 1/2 shillings, a few small amounts have been exchanged at 6d 1/2 and 7d shillings.

Drafts on the Continent is 87 francs per ounce.

On Brazil 5000 ounces drawn at the rate of 28 $ 900 to 29 $ 600 per Donblouns.

Paper currency has fluctuated very much during the fortnight, the depreciation in the market both in notes and the comparatively high figure of 420; but in a few days the scarcity of gold from exportation, speculation and a panic has run it up 12 per cent when the rate they declined again to 405 and now close again at 418.

Bolivian currency is firm at the rate of 11 1/2 per doublon, price of the past transactions.

The great necessity of admitting foreign coin is now an acknowledged fact The basis on the last two or three days has begun to receive it and the majority of the mercantile firms have signed an agreement to receive it the same rates as the Bank. Let us hope This we consider of high importance to our market and request our colleagues at home to reproduce in their columns for the information of the foreign circles.

COMESTIBLES.

Our comestibles market has been exceedingly dull this fortnight, sold by on the spot, which have rendered the dealers exece ingly cautious in their purchases.

Most of them were well assorted, and had no inducement to i ease their stocks during the monetary crisis. Accordingly, the cargoes arrived some days last week found no sale.

Payments in specie have been very difficult, and in some instances have been refused for a time.

We ex ect no improvement for nother fortnight, as the bad effects of the crisis must be felt for a short time yet.

The following are the limited sales which have been effected since last mail.

Sugar. per Moliere from Havre 600 barrels refined 18 rls in bond.

per Volante from Pernambuco 1000 bags white 18 rls; 1250 do common at 15 1/2; 250 do low at 13 rls. per Candida from do 1700 barrels privateformes; per Gustave Pastet from Rio Janeiro 1000 bags white at 18 rls.

PRODUCE REPORT.

Our produce market has suffered, although not so severely, the bad effect of the monetary crisis.

Arrivals of wool and hides from the country districts have diminished, and there has not been much animation in produce from the interior.

Saladero produce had been selling at good prices, but on presents purchases, they more freely than during the previous fortnight.

Transactions in hay hides for North America and Germany have been of most nominal and very limited for the Mediterranean.

We annex the list of sales effected during the fortnight in our produce market.
